

# Large Animal Emergency Rescue Workshop - The Core Skills You Need to Know!

**When:** 08:30am - 5:30pm Saturday 27 October 2012;  
08:30am - 12:30pm Sunday 28 October 2012.

**Where:** Brookleigh Estate  
1235 Great Northern Highway, Upper Swan WA 6069

Brookleigh is located in the Swan Valley, just 30 minutes drive from Perth City and 15 minutes from the International and Domestic Airports. The entrance to Brookleigh is just 10 minutes north of Midland, on the left hand side of the Great Northern Highway. Visit [www.brookleigh.com.au/contact.html](http://www.brookleigh.com.au/contact.html)

**Presenters:** Anthony Hatch, Fire and Rescue NSW  
Dr Christine Smith, Agnes Banks Equine Clinic

EVA will host a Large Animal Emergency Rescue Workshop which will cover essential skills necessary in dealing with many equine emergency situations on Saturday 27 & Sunday 28 October, 2012.

Why not brush up on your equine handling techniques by attending EVA's Technical Large Animal Emergency Rescue (TLAER) workshop. The workshop will cover all of the core skills you will use in day to day equine practice, from how to safely handle horses recovering from an anaesthetic, to horses cast in stables, stuck in fences, ditches, gates, barriers and floats.

The skills learned at this workshop will serve you well in routine equine practice, as well as stressful equine emergency rescue situations.

Bruce the mannequin horse is kindly sponsored by:

# Large Animal Emergency Rescue Workshop - The Core Skills You Need to Know!

During the workshop, Anthony Hatch (Fire & Rescue NSW and Churchill Fellow), will guide delegates through many aspects of large animal rescue and handling techniques including;

- Training for veterinarians and professional animal handlers to respond to emergency situations involving horses;
- How to support, assist and co-ordinate the emergency rescue personnel during the emergency;
- Specific practical demonstrations on how to conduct a variety of rescue techniques for removing animals from mud, sand, creeks, tanks and trailer extraction;
- Improvising Large Animal Rescue equipment.

Anthony Hatch ("Hatchy") is widely regarded as the leading Australian authority in large animal emergency rescue techniques. Hatchy is an entertaining speaker and the workshop will be very hands on.

Christine Smith will discuss assessment of a horse requiring emergency assistance, recommended sedation and anaesthetic protocols, working effectively with rescue personnel as well as her experiences in stressful equine emergency situations.
